

REGULAR CARE MAINTENANCE OF HARDWOOD FLOOR

To keep floors their best, we recommend that they be dusted, mopped, or vacuumed at least twice a week; more often on high traffic areas.

Regular dusting, mopping or vacuuming is essential for the care of hardwood floors. A good quality dust mop or vacuum attachment is the most effective tool for cleaning dust and dirt off the floor.

Spills and tracked-in dirt can be cleaned by lightly damp-mopping the floor with a household sponge mop. Use clean water for regular sponge mopping. **ONLY USE DAMP MOP.**

If necessary, weekly cleaning with a mild all-purpose cleaner is harmless. The finish manufactures recommend the following cleaning agents:

Spic & Span Liquid	1/4 cup to a gallon of water
Mr. Clean	1/4 cup to a gallon of water
Persons Ammonia Cleaner	1/3 cup to a gallon of water
Spic & Span Pine Liquid	1/4 cup to a gallon of water
Pine Sol	1/4 cup to a gallon of water
Lysol Liquid	1/4 cup to a gallon of water
Windex, Glass Plus, Glass Works	
Spray glass cleaners on Water Dampened Sponge	

* **Recommended (*Offered by us*):**

Polycare hardwood floor cleaning system, contains:

- 20 oz. PolyCare Spray Cleaner
- 52" telescopic mop handel
- Durable molded plastic mop head
- Machine washable terry cloth cover
- Cleaning guide

Additionally, we sell: Polycare spray, scuff remover, concentrate and terry cloth mop cover (2 per pack).

DO NOT SPRAY DIRECTLY ON THE FLOOR.

DO NOT USE THE FOLLOWING PRODUCTS OR ANY PRODUCT SIMILAR IN NATURE:

- | | |
|---|---------------------|
| - Dishwashing Detergent | - Murphy's Oil Soap |
| - Powdered All Purpose Cleaners | - Formula 409 |
| - Endust, Pledge, or other dusting products. | - Paste Wax |
| - Future, Mop N Glow, Brite, or any other polish. | - Fantastic |

DO NOT WAX SPRAY BUFF!! Water and oil base urethane finishes require little maintenance. Therefore, it is not necessary to wax or polish floor. Waxes or polishes will make the floor harder to clean and will cause problems for future re-coats.
